BiOWiSH™ for Aquaculture Applications

How to Increase the Bottom Line on your Shrimp Farm in 2 Simple Steps

How can farmers achieve more profitable shrimp with minimal investment? BiOWiSH Technologies’ 2 step process for aquaculture works without overspending upfront on new products and additional labor to implement.

Step 1: Improve Water Quality with BiOWiSH™ AquaFarm
BiOWiSH™ AquaFarm is a powerful mix of biocatalysts that improves and maintains water quality by accelerating the removal of nitrogenous wastes and promoting water biology.

Benefits of BiOWiSH™ AquaFarm:
• Improves water quality
• Nutrient management
• Helps odor control

Improved water quality includes:
• More efficient nitrogen cycle
• Improved levels of dissolved oxygen (DO)
• Reduced sludge accumulation
• Reduced need for pond cleanout

Step 2: Increase Profits with BiOWiSH™ MultiBio 3PS
It is widely accepted that the largest upfront cost for all animal agriculture farmers is the feed. BiOWiSH™ MultiBio 3PS is a direct fed microbial that, when added to the shrimps’ diets, cultivates bacteria under many stress conditions.

Unique Benefits of BiOWiSH™ MultiBio 3PS:
• Highly efficient and fast acting
• Effective across a wide range of biologically relevant feed and animal types including shrimp and fin fish
• Cost-effective and its performance for the end-user yields a leading return on investment

When you are ready to take the first step toward a more profitable aquaculture operation, contact your local BiOWiSH™ Distributor, found online at biowishtech.com/distributors. We also have a team of Animal Health Technicians available to answer your questions. Contact us today.
BiOWiSH™ for Aquaculture Applications

BiOWiSH™ Aquafarm

Available Sizes:
• 3.5oz (100g)
• 2.2lbs (1kg)
• 11lbs (5kg)
• 22lbs (10kg)

Suitable for the Following Aquaculture Applications:
• Hatchery & Maturation Tanks
• Pond Preparation
• Shrimp Raceways
• Shrimp Production
• Fish Ponds and Tanks
• Ornamental Fish Ponds

Dosing Rates Depend On:
• The volume of water in the hatchery, raceway, growout pond or lagoon
• The amount of organic matter on the bottom of the pond
• The density (number) of fish or shrimp in the pond - the higher the animal density the more organic waste load
• Please see specific User Guides for suggested dosing rates and procedures

BiOWiSH™ MultiBio 3PS

Available Sizes:
• 2.2lbs (1kg)
• 11lbs (5kg)
• 22lbs (10kg)
• 55lbs (25kg)

Suitable for Coating the Following Aquaculture Feeds:
• Sinking shrimp feed
• Floating pelleted aquaculture feed

BiOWiSH™ MutiBio 3PS can also be dosed in the water for raceway systems, and hatchery and maturation tanks.

Dosing Rates Depend On:
• Species
• Age
• Management practices

For animal or site specific recommendations, please consult your local BiOWiSH™ Technologies distributor.
